

The figure displays a phylogenetic tree with UniRef90 identifiers as nodes. The tree is rooted at the top and branches downwards. Nodes are labeled with UniRef90 identifiers. Colored boxes highlight specific clusters of sequences, primarily in yellow, red, and blue.

The figure is a sequence logo plot showing the conservation of amino acids across 100 positions of a protein sequence. The y-axis lists UniProt IDs, and the x-axis represents positions 1 to 100. Each box contains a letter representing the most frequent amino acid at that position, with color coding indicating conservation: black for highly conserved, blue for moderately conserved, and red for less conserved.
